Plant Specifications for Mitsui MT1000 Twin Header

Plant Number: MEA – 002

Features:

- Low Noise – Since the cutting style enables the noise level to lower, it is usable in residential areas.
- Low Shock – small reaction on the hydraulic system of the excavator.
- Clean Cutting Face – due to cutting the rock with picks, the cutting face is finished clean.

Cutting Drum Revolution: 81 (@ 220L/min)

Working oil Pressure MPa: 24.5 – 31.4 Max

Working Oil Flow Rate L/min 220 – 250 Max

Weight (with bracket) 1,400 Kgs

Applicable Soil (Compressive Strength) 39.2 MPa Max

Applicable Hydraulic Excavator: 0.6 – 1.2M3
